

BEAN AND BEAR LAKES LOOP

The closure will begin May 15th, 2024.

The Bean and Bear Lakes Loop closure will begin May 15 and impacts 2.2 miles of the main SHT corridor between the western junction of the spur trail to the Bay Area Historical Society Trailhead and an all-terrain vehicle trail to the north of Bear Lake. This closure will also impact 1.2 miles of the eastern spur to the Bay Area Historical Society Trailhead between the main SHT corridor and the junction with the western arm of the spur.

Trail users will be able to bypass the closed section using an SHT spur trail and George's Gorge Trail, an ATV trail. This closure includes the Penn Creek and Bear Lake Campsites, and all Bean and Bear Lake overlooks. Bear Lake Campsite will be rehabilitated as part of the larger renewal project.
